Profile

I am always up for a good challenge. Be it learning a new language, taking up a second major in school, or picking up a new skill, I am always more than willing to learn something new.

Besides taking up a second major in computer science, I have also been a learner of Japanese for 5 years, leading me to create many JP-EN translations of modern-day Japanese media, which can be found on the internet (garnering a total of over 120K views). Some of my translations and coined terms for the episodes translated are used by media websites such as Crunchyroll, and Japankyo.
